SUMMARY

I am a dedicated software developer currently pursuing my Master's in Computer Applications, bringing strong programming skills in Java and Python. My experience includes team collaborations on impactful projects, where I've contributed to both backend and frontend development. I'm passionate about leveraging my technical capabilities in a challenging software development role

PROJECTS

Blood Donor Finder

A platform to facilitate blood donation connections

- Collaborated with a team to build a platform connecting blood donors and seekers based on blood group and location
- Contributed to the backend development using Spring Boot and database design in MySQL
- Assisted in integrating donor notifications and search functionalities
- Participated in frontend implementation to ensure seamless user experience

SkillTube - MicroVideo Learning Platform

A full-stack web platform that enables users to learn and teach through short educational videos with interactive and role-based features.

- Developed a role-based system for students, teachers, and admins with secure authentication and authorization.
- Built features for video upload, streaming, browsing, and enrollment with categories and tags.
- Implemented interactive functionalities including likes, comments, reporting, and notifications.
- Designed and integrated RESTful APIs using Node.js and Express.js with MongoDB for efficient data handling.
- Created a responsive frontend using React.js, ensuring a smooth and user-friendly learning experience.
- Tech Stack: React.js, Node.js, Express.js, MongoDB, REST APIs, JWT Authentication.

Microservices-based Order Management System

An order management system employing microservices

- Worked in a team to design a modular order management system using microservices architecture
- Developed and tested APIs for Item Service module
- Assisted in setting up Docker containers for service deployment and local testing
- Collaborated on integrating microservices and ensuring proper communication between them

SKILLS

Languages

Java Python JavaScript HTML CSS

Databases

MySQL MongoDB

Frameworks

Node.js Express.js Django JDBC Java Servlets

Tools

Git Docker VS code Pycharm IntelliJ IDEA

EXPERIENCE

Java Development Intern

Octanet

📅 03/2025

Software development company focused on Java technologies

- Worked on Java-based projects using Spring Boot and Hibernate
- Gained exposure to backend development, database integration, and coding best practices

EDUCATION

Master of Computer Applications (MCA)

P.R. Pote Patil College of Engineering and Management

📅 07/2024 📍 Amravati

Bachelor of Science in Computer Science (B.Sc. CS)

Sant Gadge Baba Amravati University

📅 06/2021 - 06/2024 📍 Amravati
